

**FAKULTET TEHNIČKIH NAUKA
KOSOVSKA MITROVICA**

Modern coordinate metrology

**Milan Blagojević, asistent
Kosovska Mitrovica, mart 2022**

Lesson 1 (2 hours):

Lesson title: Introduction to metrology

Lesson 2 (2 hours):

Lesson title: Coordinate Measuring Machines

Moving-bridge CMM

Fixed-bridge CMM

Cantilever CMM

Gantry CMM

L-Shaped CMM

Lesson 2 (2 hours):

Lesson title: Coordinate Measuring Machines

Lesson 2 (2 hours):

Lesson title: Coordinate Measuring Machines

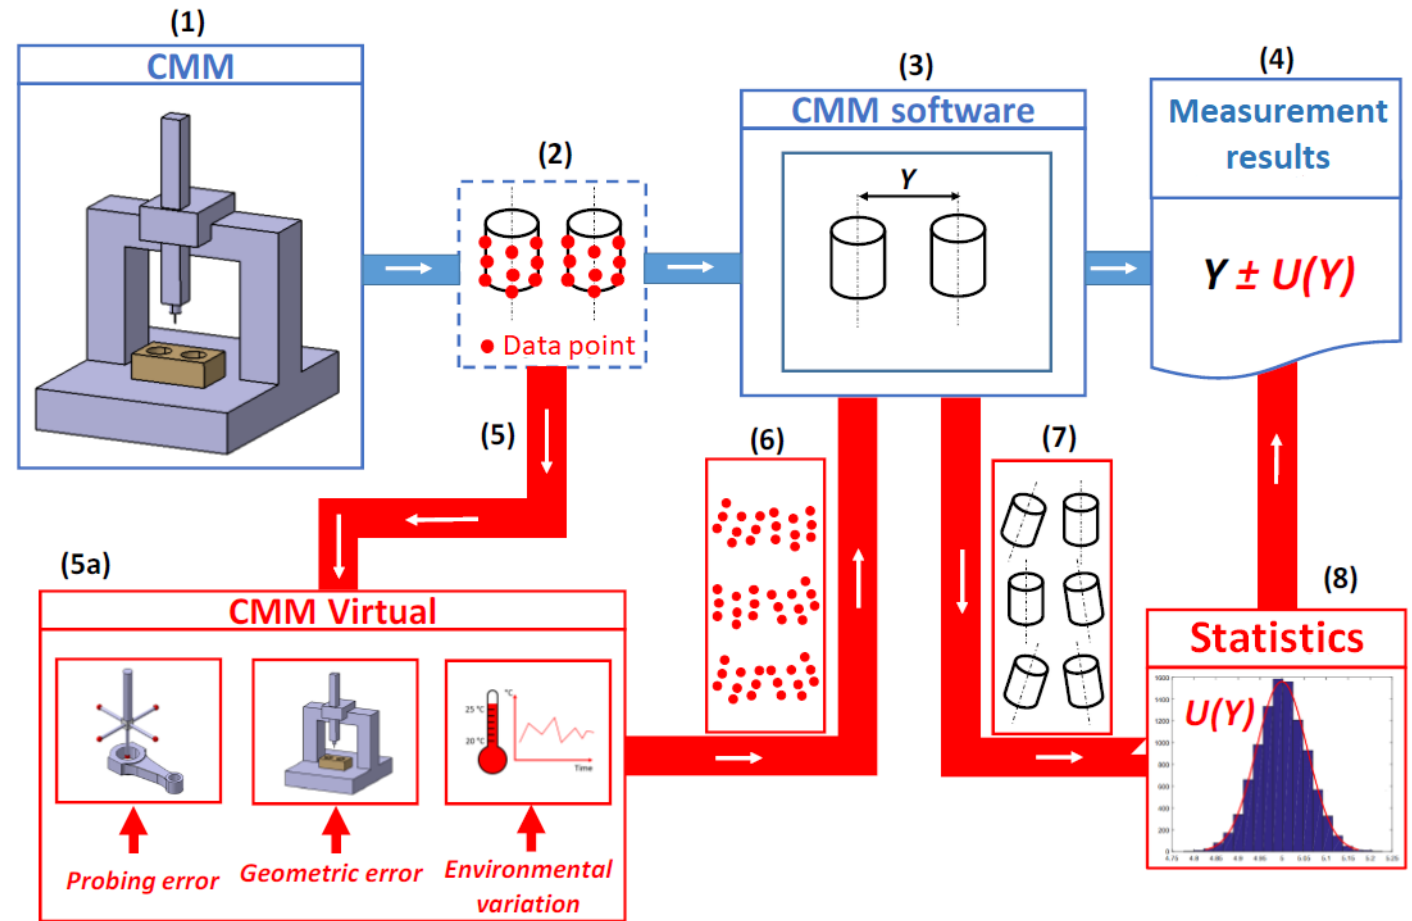

Illustration of measurement uncertainty based on Monte-Carlo (MC) simulation (ISO 15530-4)

Lesson 3 (4 hours):

Lesson title: Portable CMM

Lesson 3 (4 hours):

Lesson title: Portable CMM

Lesson 3 (4 hours):

Lesson title: Portable CMM

Lesson 3 (4 hours):

Lesson title: Portable CMM

Lesson 4 (2 hours):

Lesson title: Stationary CMM

Lesson 4 (2 hours):

Lesson title: Stationary CMM

Lesson 5 (4 hours):

Lesson title: Systems for optical 3D digitization

Lesson 5 (4 hours):

Lesson title: Systems for optical 3D digitization

Lesson 5 (4 hours):

Lesson title: Systems for optical 3D digitization

Lesson 5 (4 hours):

Lesson title: Systems for optical 3D digitization

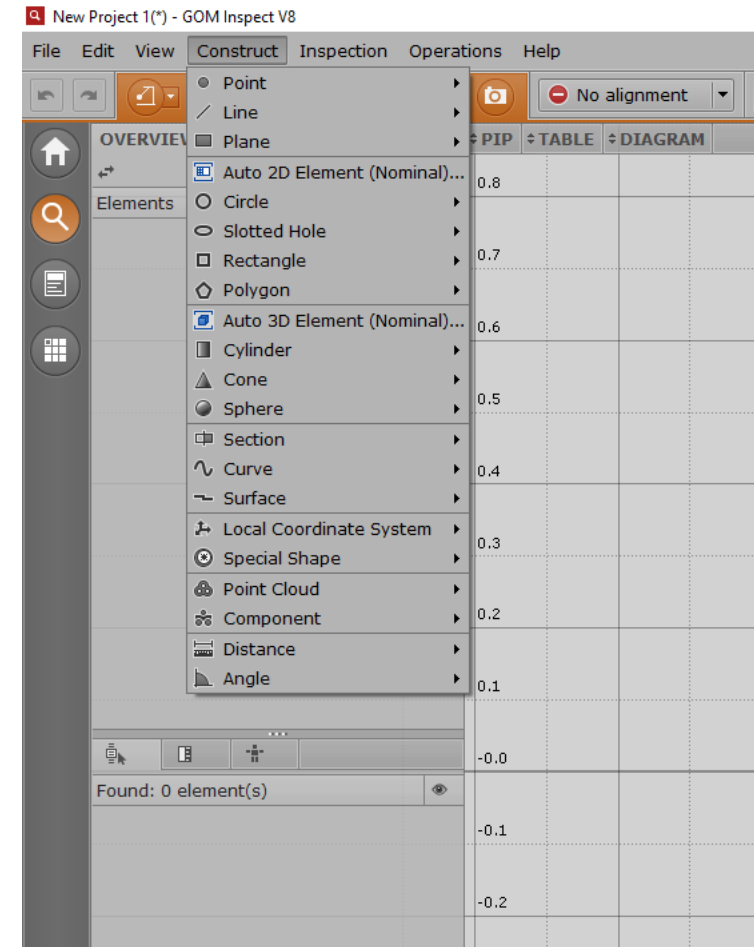

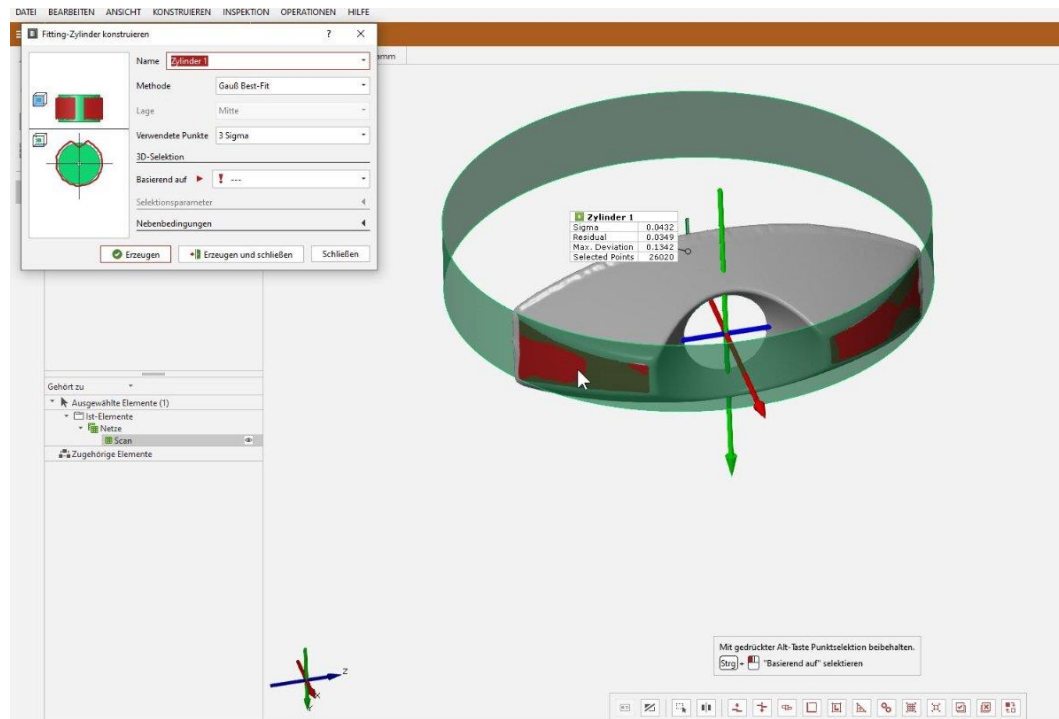

Lesson 6 (2 hours):

Lesson title: Measurement data: Discrete measurement points, point cloud and polygonal model

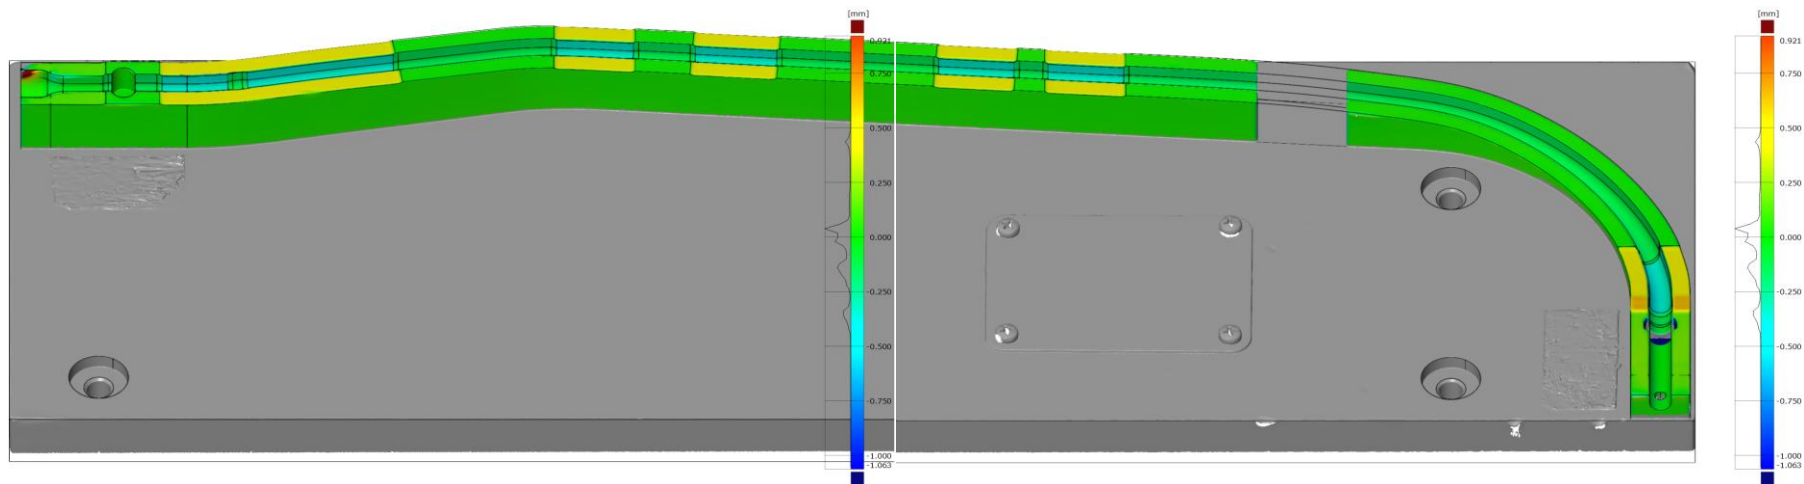

Lesson 7 (2 hours):

Title of the lesson: Basic geometric entities. Transformation and registration

Lesson 8 (4 hours):

Title of the lesson: Examples of simple measurement projects

Lesson 9 (2 hours):

Title of the lesson: Geometric Dimensioning and Tolerancing (GD&T)

GD&T Standards:

ISO GPS (geometric product specification), established by the International Organization for Standardization

ASME Y14.5, established by the American Society of Mechanical Engineers
